To Whom it May Concern

This letter serves to inform that the procedure to receive hazardous waste materials for treatment and disposal at the Mile 24 Regional Sanitary Landfill is being standardized.

We have outlined a step-by-step procedure, from the onset of requesting the use of service to the delivery of consignment to the facility. Find attached the procedure outlined along with the necessary Manifest, Waste Profile Sheet and Inventory Form to all be filled out and submitted with the delivery of every consignment.

It is expected that our clients will comply with the new procedure. Note that no hazardous waste consignments will not be accepted if the procedure is not followed. If there are any uncertainties or if any additional information need for clarification as it relates to the new procedure, please feel free to contact us at the Belize Solid Waste Management Authority.

Sincerely,

Ms. Lumen Cayetano

Director Belize Solid Waste Management Authority/ Solid Waste Management Project II
